

Absolutely! While the rest of the world is falling like flies to drop the genesis mode, the mode from which the wellspring of all wireless began, the spark that started it all- we as a sovereign nation must maintain our role as a leader on the World Political scene. My considered opinion is to keep the 5wpm test for General, while raising it to 20 wpm, because we A) Value our deep seated wholesome traditions, and B) because at 20 wpm CW is actually exceptionally useful.
